WE BUILD ADVENTURES

FeetOffGround is a concept born out of the sheer love for adventure and the outdoors. We are climbers at heart and are eager for you to experience the joy of climbing.

## We Build Adventures

Climbing walls.

Play systems for children and turnkey playground design.

Fitness - Functional training and calisthenics equipment.

Adventure Parks.

Just get to the climbing, we'll build them...!!

---

Founded in March 2012.

First Concept Retail store operational - May 2012 - operated a climbing wall here for 3 years.

Second Retail store operational - May 2014.

From May 2015 onwards, we migrated from the retail business format to manufacturing of climbing walls, play equipment and fitness equipment.

# Climbing Walls

---

FeetOffGround brings to you, customised, tailor-made climbing walls and ready-to-install walls that are scientifically designed and backed by over 30 years' of experience.

Why do you need a climbing wall?

For your home: Your private 24 / 7 family workout. Every climb is unique and with your own personal wall, you can choose from over a thousand different combinations to ensure that monotony never creeps in.

For the office: It's proven that productivity is increased when the mind and body are engaged in an unrelated activity from ones work. So no more staring endlessly at a screen, waiting for the proverbial bulb to light up. Instead, take a break and start climbing!

For Communities: Living complexes are always looking for activities to bring together the people living in them. And what better way than a sport that can bring alive the spirit of community living. Climbing is a great way to bond with people.

---

- It's a great cardio workout that simultaneously tones those neglected muscles.
  - Improves dexterity, balance, concentration and endurance.
  - Builds confidence by making you push your limits of what you thought was possible.
  - And its great fun...!!
-

# Types of Climbing Walls We Build

---

# Bouldering Walls

- This is climbing in its elemental form - no ropes, no gear.
- Walls are up to 16 feet high.
- Specially designed crash pads below protect your fall.
- No requirement of special gear or trained staff.

# Sport Climbing Walls

- Comparatively larger walls - no restriction of height.
- Special gear needed to protect fall.
- Trained staff needed to operate the wall.
- Climbers need to be trained in usage of gear.
- Gear needs to be checked and inspected for damage on a regular basis.

# Interactive Bouldering Walls

- This is a fun extension to bouldering.
- You can play against your friend or just challenge yourself with the next level of difficulty.
- Walls are up to 10 feet high.
- Specially designed crash pads below protect your fall.
- No requirement of special gear or trained staff.

# Theme Based Climbing Walls

- Comparatively larger walls - usually 32 ft in height.
- Special gear needed to protect fall - AutoBelay Devices.
- Trained staff needed to operate the wall.
- Gear needs to be checked and inspected for damage on a regular basis.

# Unstructured Play

---

Playground Design

# Importance of Play

- Play is a fundamental part of growing up. Children need to play in order to develop socially, physically, emotionally and intellectually.
  - While most play systems satisfy the basic purpose of play, our play systems are designed to improve a child's motor skills, dexterity, balance, concentration and endurance; induce a sense of confidence and satisfaction and most importantly to expand their creativity.
  - Most forms of adventure have the same end result and our play systems are inspired from the many climbing and adventure experiences that we have had ourselves.
-

# Types of Play Systems we build

- Play can be structured or unstructured.
  - Structured Play has a set of rules with specific objectives.
  - Unstructured Play is open ended and has endless possibilities. Unstructured Play promotes creative problem solving and develops a child's cognitive and imaginative skills.
  - Our playgrounds are designed keeping in mind the balance of Structured and Unstructured Play that aids in a child's overall development.

# Functional Training

---

Calisthenics Setups

# Calisthenics and Functional Training

- Calisthenics is an ancient form of exercise practiced by the Greeks for overall body fitness.
  - We build calisthenics equipment and can custom make them to suit any space and aesthetic.
-

# Reasons to add Calisthenics to your setup

- Activities like climbing, and body resistance training done over a short period of time have dramatic muscle memory benefits.
  - Highly involved activities like calisthenics lower stress levels.
  - For a reasonably low initial investment you get a wall that will last you 5-10 years with almost no maintenance.
-

# Benefits of Calisthenics

- It's a great cardio workout that simultaneously tones those neglected muscles.
  - Improves dexterity, balance, concentration and endurance.
  - Builds confidence by making you push your limits of what you thought was possible.
  - And its great fun...!!

# Adventure Parks

---

....and Ropes Courses

# What are Ropes Courses

- A ropes course is a challenging outdoor or indoor personal development or team building activity made from metal, ropes and wood.
  - They consist of high or low elements.
  - They aid in the process of building trust within team mates, confidence in ones self and understanding of ones personality.
  - Low ropes courses when used with kids helps improve balance and motor skills.
